# REPORT 2017- 2019

BioData.pt   
THE PORTUGUESE  
INFRASTRUCTURE FOR  
BIOLOGICAL DATA

## HIGHLIGHTS June 2017-September 2019

### COURSES

To be at the forefront of Science with  
Bioinformatics expertise.

18

### EVENTS

Sharing a vision towards value creation  
from biological data management and  
innovative tools.

29

386 participants

### INTERNATIONAL PUBLICATIONS

Achieving international recognition.

info@elixer.pt  
or elixer@elixer.pt

The Cool Tools for Science conference put the spotlight on tools and solutions to support research, rather than on research itself. The event was very successful, attracting even participants from abroad, and showing that there is a clear interest in this topic. We are looking forward to hosting further editions of the conference.

79 Participants 26 Tools

**BioData.pt Events • BioData.pt Events • BioData.pt Events**

**WORKSHOP**  
**Plant Phenotyping-Genotyping Data Management**  
NOVEMBER 12<sup>th</sup>  
@ ITQB NOVA

This workshop served to disseminate the work on standards and data management practices developed by the Plant Sciences Community at the ELIXIR-wide level, with strong participation from the PT node. The workshop included a keynote lecture from the notable Dr. Anne-Françoise Adam-Blondon, which nearly filled the ITQB auditorium to capacity, and a hands-on exercise on MIAPPE data submission, which did fill the classroom to capacity.

Lectures 80+ Participants Hands-On 30 Participants

# TO GET YOUR ATTENTION

## ELIXIR PT COMPUTING SERVICES

Coordinated by INESC-ID, the BioData.pt computing infrastructure includes IST, IGC and CCMAR as cloud service providers. The service provides virtual machines on demand, complemented by a user-support service. Additionally, the infrastructure provides computing capacity to Galaxy Europe through the Pulsar network, which enables Portuguese researchers to use the infrastructure when submitting jobs to Galaxy Europe.

### Report Period

785 vCPUs	1.8 TB RAM	156 TB Storage	321 Active VMs
--------------	---------------	-------------------	-------------------

## PYTHON VIDEO ANNOTATOR

APPLYING  
FOR ELIXIR  
NODE  
SERVICE

An open source graphical application for analyzing and annotating events captured in video. PythonVideoAnnotator was developed in concert with a video-capturing rig, with the aim of helping neuroscience and ethology researchers study animal behaviors. Ultimately, the goal of this software tool and supporting set-up is to bring Open Science practices to the study of animal behavior and promote reproducibility and standardization. During the period of this report, PVA was **downloaded more than 2700 times**.

### OTHER NODE SERVICES

PLAO is a semantically rich ontology that models plant experimental biology in its full extent, from plant growing, to sample collection, to molecular experiments, to data analysis.

Plant Experimental Assay Ontology (PEAO)

RNA workflow is a workflow for the analysis of plant small RNA sequencing data developed at ICBT.

PHYLOVIZ allows phylogenetic inference and data visualization for large datasets of sequence based typing methods. It is available as both a standalone tool and a Web application service.

### OTHER COMMUNITY SERVICES

**Bioinformatics Docker Images Project (BIPD)**  
A project aiming to containerize commonly used Bioinformatics tools and workflows to enable accessibility and reusability. Currently includes over 40 well-documented Docker images.

**EnoPT**  
A web tool for the analysis of Protein-Protein interaction data that supports both within- and between-species interactive comparisons.

**Systems Biology Tools**

- martin
- CellAMP
- OptiFlux
- Stem Cell
- NetStem Checker

**Bioinformatics Tools**

- BiomeShiny
- PhyloPrinter
- GOEnrichment
- ADOPT
- BLAST Database Manager
- SED
- BioGRID
- MITOBreak
- APiGen
- Tofusion

**Other Tools & Services**

- PHENO
- NCBI Mass Downloader
- Structure\_Reader
